Notes

- Tolerances comply with VDE0530. A tolerance of $\pm 10\%$ applies to non-specified values.
- If a shaft seal is fitted on the drive shaft, slightly lower torque levels should be expected due to friction losses.
- The technical data provided in the table and power curves refers to a DC voltage supply with a permissible harmonic content of up to 5%.
- The data is only valid for use in ambient temperatures between 0°C and 40°C. Above or below this temperature range, there is a risk of permanent damage to the product.
